

Taken by the Alien Warrior (Warriors of Agron #1) By Hope Hart When the heroine gets upset that a previous flame was flirting with the H and touching his face and his response was to smile at the rival (even though he knows the h has some serious trauma and confidence problems) the h is made to seem as having trust issues and he gets angry at her that she won't trust him. How about not letting someone you know is in love with you touch you and flirt with you when you are in a relationship with someone else? Not a lot of action or intrigue. The h is described as not being very attractive not confident kind of a coward honestly no real redeeming qualities so why did the H fall for her? She is honestly a bit of a doormat and happy about it she just wants to be a kept woman if only it was developed further if the characters were given real depth if the story was expanded.

Taken by the Alien Warrior (Warriors of Agron #1) This is the first book I've read from Hope Hart and the blurb was enticing enough the h being abducted by aliens rescued by huge barbarian aliens. Some of them stay together with the same owners a bunch of purple aliens and while being again transported to who knows where they are then freed by a different race of aliens (yellow this time) who take them from the spaceship to take them to their tribe in the planet Agron. The leader warrior Terex (MMC) decides Ellie (MFC) is the one for him and wants her to stay with him in order to court her; Ellie who's been bullied all her life because she's short and chubby feels attracted to him but is decided to sabotage a possible relationship. The allegedly SEAL lacks self-control whatsoever and she even insults the king of the tribe in front of everyone (I can't accept that a person like her could survive a week in the military). Perhaps this is a personal dislike or it's cultural but the romance part was lost on me I couldn't understand how a guy like Terex (considerate brave and honorable) could feel so attracted to someone like the h. I will never agree with the whole protecting women means taking away their choices but stubborn is as stubborn does! Also a man who allows another woman to touch him when he knows that woman has already lied to the woman he claimed to love about being his mate in an attempt to drive the woman he loves away is totally in the wrong. And making the woman he loves feel like the hurt and jealousy is all her fault is sucky! Yes she needs to recognize her worth and beauty but you do not kick someone when they are already down. What I didn't like was that throughout the book they never really talked to one another about their wants or the future... and even at the end when she's insecure because an ex-lover is flirting with him he's like "how dare you dishonor me by thinking I would cheat" and then leaves her alone. Like... after she told you how she was bullied and her pageant queen sister tortured her you're not going to give her a pass for being insecure? The aliens on this planet are again not really aliens. TW women kidnapped and sold threat of cannibalism / assault Taken by the Alien Warrior (Warriors of Agron #1) All hell breaks loose when a small group of Earth Girls hits Agron. All the other women are gorgeous and tall and fit looking while she is short with a large bust adventure and a sweet romance filled with hot steamy moments between Terex and Ellie. It seemed like after the ship crashed they lucked out but sadly that wasn't true it was only later after they were saved again they were told how bad of a situation they were in. Not only that it took a light on how the h tried to survive in a planet and its habitats but also dealt with being in a team body issues and crash course on survival 101; on top of finding the love of course. No virgin No one-mating scheme H/hs had past lovers Alien warrior H (ex) teacher human hNO contraception No OW/OM though H's past lovers kept on trying to stake the claim Impregnation HEA Overall score: 4.5 interspecies coupling stars Taken by the Alien Warrior (Warriors of Agron #1) I enjoyed the setup of this book and the world building is wonderful i like the characters and slow burn feelings. Taken by the Alien Warrior (Warriors of Agron #1) Taken by one alien race only to be saved by another! This is a continuation of Hope Hart's Arcav series and features the missing women from the first book. Really hope Nevada's book is next! Taken by the Alien Warrior (Warriors of Agron #1) Hope Hart has always told stories and eventually the characters in her head wouldnt leave her alone until she wrote them down. Then some rivals for his affections are introduced for no real reason, The shame of it all is that it had potential to be something great.

Wide hips and thick thighs, The group of women are then taken from the cage and one by one sold at

an auction and then taken to another spaceship and into another smaller cage and locked in, Then their ship crashes on a planet so foreign from earth and they are rescued by a race of men they have never seen before. Then they are rescued by three new types of aliens who tell them they are rescuing them from aliens who will eat them: There is a battle and four of the women have been carried off. They embark on the journey to their village with the promise to find those who have been taken, Terex is the leader of this group of men and he finds Ellie to be a prize among women and decides that she will be his woman, This story develops into a fantastic tale of endurance.

Sadly it fell short This book is a great summary of what had potential to be a good book: If only the author had written a longer book and taken the time to develop the characters/world/situations this could have been fantastic, It is an instalove/lust book where the hero immediately falls in love for the heroine but we don't know why: The first few chapters are ok there's this group of human women all abducted from their beds and transported to an alien auction where they're sold to different buyers. Well these guys are bad news but there come the hunky good aliens and save the women from them: Frankly this character and a secondary one Nevada (another of the human women a former SEAL) completely ruined the story for me. These two women wouldn't survive in a different country (they'd be kicked out) let alone a different world, I think authors write this type of women believing they express passion but they come across as obnoxious imo, I hate to give low ratings but I have to be honest; it doesn't mean that other readers find this amusing and can enjoy it: If you don't mind this type of female character and enjoy abductions and barbarian aliens this is quite the standard story for that. Taken by the Alien Warrior (Warriors of Agron #1) I liked this story, Taken by the Alien Warrior (Warriors of Agron #1) I'm finally discovering alien romances that don't take a loooooong time to set up: This one leaps into a story about human women who are abducted rescued by evil people then rescued by good people... although their group is split up in the process, Terex is a hot warrior and Ellie is a shy short curvy kindergarten teacher who can't believe he's into her: They're basically muscular guys with a few strips of scales on their skin because they're descendants from dragons but appear to just be oversized humans: The world building seemed a tad underdeveloped unless I missed how everyone was able to speak the same language immediately: One Warrior just can't get enough; even with Terex believing he was dying he could only think of Ellie's kisses: "You're not dying" she declares even as tears run down her face: "And this young man wrung his tiny female out in the best way possible: The poor girl could hardly walk... Yes Please! Sweet story that I couldn't put down until it was finished. As I was reading I was feeling sorry for this group of girls. But at least there was no mention of Horns...LOL Taken by the Alien Warrior (Warriors of Agron #1) The aliens who abducted me made a mistake, The Grivath have sold us on Gule- a planet known for dealing in human flesh. The women who are being held captive with me are in high demand and they all look like models, Maybe they really meant to take my pageant queen sister? If that's not bad enough our ship has crashed and half of the women are missing: Did I mention the locals want to eat us? Insert the tall sexy warrior aliens who saved us: Things are looking up except that one of them is eyeing me like a snack and not in a cannibalistic way-- if you catch my drift: Terex is rough fierce and bossy and doesn't seem to understand that I can't stay and be his snuggle bunny, I'm not quite sure why he isn't chasing after one of the other women when every man I've ever known has overlooked me: When he looks at me he doesn't seem to see chubby awkward Ellie. Now I've just got to convince him to help me find the other women and get back to Earth. Should be a piece of cake... Right? Taken by the Alien Warrior is a full-length romance with no cliffhanger and a guaranteed HEA: While this is a spin-off series from the hugely popular Arcav Alien Invasion series this is a standalone series. If you like hot dominant aliens kick-ass heroines and steamy romance you'll love Warriors of Agron- Hope Hart's new sci-fi romance series. Taken by the Alien Warrior (Warriors of Agron #1)

I really enjoyed reading this book, A group of women have been taken from their beds on earth and wake up in a strange ship in a cage where they are in all forms of being undressed: Well worth reading and I have been left wanting to find out more of the journeys of the other women. I'm totally hooked on what promises to be a great series, I received a free copy of this book via Booksprout and am voluntarily leaving a review: Taken by the Alien Warrior (Warriors of Agron #1) This was pretty fare for an Alien romance: I wish that there would have been more of when the women were stolen to how they ended up at the first auction, It was interesting to see Ellie Vivian Nevada and Alexis settle in at the new place. All of them made some interesting choices about the missing women Alexis most of all. I was glad to see how things ended for Ellie and Terex and look forward to reading more in this series, Taken by the Alien Warrior (Warriors of Agron #1) One hunky playboy alien warrior met one sweet (ex) human teacher with confidence issues. The book was a good kick start for a group of a human female trying to survive an alien planet. I have to say I now kinda dig all this stranded-in-new-world-slash-planet with a game of survival as the main backbone: I like how the story kept evolving as the characters in the story popping in: All the characters were well developed and I have to be honest I liked all of them; with their flaws and quirks, The conflict worked really well too as seemed fitting and true to who they're: Ellie and Terex are rather adorable together learning about one another as they go and differences between them, Both are rather set in their ways so it was fun to see them push each other Ellie with trying to protect him and Terex admiration from the start. Especially admired the woman so much and how they supported each other, Even with their differences they bond over the situation and fight for each other: Not willing to sit around and wait for the aliens to help took the situation into their hands. True it may seem foolish with their lack of knowledge on this world but I appreciated it so much that they were willing to at least try, I probably liked that more then the romance that the woman are a challenge and very different perspectives on events. They were not damsels in distress throughout they tried their best even if they didn't always make the best choices. Overall I enjoyed this story it was fun and fast paced with lots of growth while leaving open for the next books, Still gives them a happy ending [I didn't like the Hero of the next book at all so I'm not interested in continuing the series: I enjoyed this actually a little more than I thought I would. Hope believes that everyone deserves a happy ending although the best happy endings are fought for, Hope Hart has always told stories and eventually the characters in her head wouldn't leave her alone until she wrote them down: Hope believes that everyone deserves a happy ending although the best happy endings are fought for[1]

Which does not make a very interesting story. Just a quick instalove (for no real reason) story. But alas she did not right up to my alley. And here is where started to go downhill for me. Both characters are petulant irrational and self-absorbed. it was unbelievable to me. I wanted to like her but couldn't. You help them up until they can stand by themselves. I'm the end it all works out though. I didn't love the pairing of this one. "Kiss me...one last time...tiny female." I crack open my eyes to find Ellie scowling at me. "You don't get any kisses until you're back at camp." "Cruel female. They would have been better off taken by the Arcav. Me? I'm 5'2 shy curvy and a kindergarten teacher. But not Terex. And his gaze burns brighter instead of shifting away. Read it Now. Ellie is the only one in flannelette pjs. This book in particular was quite intriguing. I guess

that's a must since there're sequels. The book was also easy to digest and read. She loves strong kickass heroines and hot brooding alpha males. She loves strong kickass heroines and hot brooding alpha males. {site_link}.
